Amendments to the Claims

This listing of claims replaces all prior versions and listings of claims in the application.

Listing of Claims

- 1. (Currently Amended) A light-emitting apparatus having a light-emitting device comprising:
 - a first electrode;
 - a second electrode over the first electrode;
 - an electroluminescent film disposed between the first electrode and the second electrode;
 - a film containing fluoroplastics formed over the second electrode; and
 - an inorganic insulating film formed [[on]] over the film containing fluoroplastics.
- 2. (Currently Amended) A light-emitting apparatus having a light-emitting device comprising:
 - a substrate;
 - a TFT over the substrate;
 - an insulating film over the TFT;
 - a first electrode over the insulating film and electrically connected to the TFT;
 - a second electrode over the first electrode;
 - an electroluminescent film disposed between the first electrode and the second electrode;
 - a film containing fluoroplastics formed over the second electrode; and
 - an inorganic insulating film formed [[on]] over the film containing fluoroplastics.
- 3. (Currently Amended) A light-emitting apparatus having a light-emitting device comprising:
 - a substrate;
 - a TFT over the substrate;
 - an insulating film over the TFT;
 - a first electrode over the insulating film and electrically connected to the TFT;

Serial No. : 10/662,508 Filed : September 16, 2003

Page : 3 of 12

a second electrode over the first electrode;

an electroluminescent film disposed between the first electrode and the second electrode; a film containing fluoroplastics formed over the second electrode; and an inorganic insulating film formed [[on]] over the film containing fluoroplastics, wherein:

the insulating film comprises a first insulating film and a second insulating film formed on the first insulating film;

the first insulating film comprises a material selected from the group consisting of acrylic, polyamide, and polyimide; and

the second insulating film is a film containing fluoroplastics.

- 4. (Currently Amended) A light-emitting apparatus having a light-emitting device comprising:
 - a substrate;
 - a TFT over the substrate;
 - an insulating film over the TFT;
 - a first electrode over the insulating film and electrically connected to the TFT;
 - a second electrode over the first electrode;
 - an electroluminescent film disposed between the first electrode and the second electrode;
 - a film containing fluoroplastics formed over the second electrode; and
 - an inorganic insulating film formed [[on]] over the film containing fluoroplastics,

wherein the insulating film contains fluoroplastics.

5. (Original) A light-emitting apparatus according to Claim 1,

wherein the film containing fluoroplastics is one type of polymer selected from polytetrafluoroethylene, tetrafluoroethylene-hexafluoropropylene copolymer, polychlorotrifluoroethylene, tetrafluoroethylene-ethylene copolymer, polyvinyl fluoride, and polyvinylidene fluoride.

6. (Original) A light-emitting apparatus according to Claim 3,

Serial No. : 10/662,508

Filed: September 16, 2003

Page : 4 of 12

wherein:

the second insulating film is a mixed film comprising fluoroplastics and metallic oxides, and a ratio of the metallic oxides in the mixed film monotonically increases from a portion of the mixed film distant from the first electrode to a portion of the mixed film close to the first electrode.

7-11. (Canceled)

12. (Original) A light-emitting apparatus according to Claim 2,

wherein the film containing fluoroplastics is one type of polymer selected from polytetrafluoroethylene, tetrafluoroethylene-hexafluoropropylene copolymer, polychlorotrifluoroethylene, tetrafluoroethylene-ethylene copolymer, polyvinyl fluoride, and polyvinylidene fluoride.

13. (Original) A light-emitting apparatus according to Claim 3,

wherein the film containing fluoroplastics is one type of polymer selected from polytetrafluoroethylene, tetrafluoroethylene-hexafluoropropylene copolymer, polychlorotrifluoroethylene, tetrafluoroethylene-ethylene copolymer, polyvinyl fluoride, and polyvinylidene fluoride.

14. (Original) A light-emitting apparatus according to Claim 4, wherein the film containing fluoroplastics is one type of polymer selected from polytetrafluoroethylene, tetrafluoroethylene-hexafluoropropylene copolymer,

polychlorotrifluoroethylene, tetrafluoroethylene-ethylene copolymer, polyvinyl fluoride, and polyvinylidene fluoride.

15. (Original) A light-emitting apparatus according to Claim 4,

wherein:

the insulating film is a mixed film comprising fluoroplastics and metallic oxides, and

Serial No. : 10/662,508 Filed : September 16, 2003

Page : 5 of 12

a ratio of the metallic oxides in the mixed film monotonically increases from a portion of the mixed film distant from the first electrode to a portion of the mixed film close to the first electrode.

16. (Canceled)

17. (Currently Amended) A light-emitting apparatus having a light-emitting device comprising:

a substrate;

a TFT over the substrate:

an insulating film over the TFT;

a first electrode over the insulating film and electrically connected to the TFT;

a second electrode over the first electrode; and

an electroluminescent film disposed between the first electrode and the second electrode;

wherein:

the insulating film comprises a first insulating film and a second insulating film formed on the first insulating film;

the first insulating film comprises a material selected from the group consisting of acrylic, polyamide, and polyimide; and

the second insulating film is a film containing fluoroplastics.

18. (Currently Amended) A light-emitting apparatus having a light-emitting device comprising:

a substrate;

a TFT over the substrate;

an insulating film over the TFT;

a first electrode over the insulating film and electrically connected to the TFT;

a second electrode over the first electrode; and

an electroluminescent film disposed between the first electrode and the second electrode; wherein the insulating film contains fluoroplastics.

Serial No. : 10/662,508

Filed : September 16, 2003 Page : 6 of 12

19. (Previously Presented) A light-emitting apparatus according to Claim 17, wherein the film containing fluoroplastics is one type of polymer selected from polytetrafluoroethylene, tetrafluoroethylene-hexafluoropropylene copolymer, polychlorotrifluoroethylene, tetrafluoroethylene-ethylene copolymer, polyvinyl fluoride, and polyvinylidene fluoride.

- 20. (Previously Presented) A light-emitting apparatus according to Claim 18, wherein the film containing fluoroplastics is one type of polymer selected from polytetrafluoroethylene, tetrafluoroethylene-hexafluoropropylene copolymer, polychlorotrifluoroethylene, tetrafluoroethylene-ethylene copolymer, polyvinyl fluoride, and polyvinylidene fluoride.
 - 21. (Previously Presented) A light-emitting apparatus according to Claim 17, wherein:

the second insulating film is a mixed film comprising fluoroplastics and metallic oxides, and a ratio of the metallic oxides in the mixed film monotonically increases from a portion of the mixed film distant from the first electrode to a portion of the mixed film close to the first electrode.

22. (Previously Presented) A light-emitting apparatus according to Claim 18, wherein:

the insulating film is a mixed film comprising fluoroplastics and metallic oxides, and a ratio of the metallic oxides in the mixed film monotonically increases from a portion of the mixed film distant from the first electrode to a portion of the mixed film close to the first electrode.

23. (Previously Presented) A light-emitting apparatus according to Claim 1, wherein the light-emitting apparatus is selected from the group consisting of digital still camera, laptop computer, mobile computer, portable image reproducing device, goggle type display, video camera and cellular phone.

Serial No. : 10/662,508 Filed : September 16, 2003

Page : 7 of 12

24. (Previously Presented) A light-emitting apparatus according to Claim 2, wherein the light-emitting apparatus is selected from the group consisting of digital still camera, laptop computer, mobile computer, portable image reproducing device, goggle type display, video camera and cellular phone.

- 25. (Previously Presented) A light-emitting apparatus according to Claim 3, wherein the light-emitting apparatus is selected from the group consisting of digital still camera, laptop computer, mobile computer, portable image reproducing device, goggle type display, video camera and cellular phone.
- 26. (Previously Presented) A light-emitting apparatus according to Claim 4, wherein the light-emitting apparatus is selected from the group consisting of digital still camera, laptop computer, mobile computer, portable image reproducing device, goggle type display, video camera and cellular phone.
- 27. (Previously Presented) A light-emitting apparatus according to Claim 17, wherein the light-emitting apparatus is selected from the group consisting of digital still camera, laptop computer, mobile computer, portable image reproducing device, goggle type display, video camera and cellular phone.
- 28. (Previously Presented) A light-emitting apparatus according to Claim 18, wherein the light-emitting apparatus is selected from the group consisting of digital still camera, laptop computer, mobile computer, portable image reproducing device, goggle type display, video camera and cellular phone.
- 29. (Previously Presented) A light-emitting apparatus according to Claim 1, wherein the film containing fluoroplastics has irregularities.

Serial No. : 10/662,508

Filed: September 16, 2003

Page : 8 of 12

30. (Previously Presented) A light-emitting apparatus according to Claim 2, wherein the film containing fluoroplastics has irregularities.

- 31. (Previously Presented) A light-emitting apparatus according to Claim 3, wherein the film containing fluoroplastics has irregularities.
- 32. (Previously Presented) A light-emitting apparatus according to Claim 4, wherein the film containing fluoroplastics has irregularities.
- 33. (Previously Presented) A light-emitting apparatus according to Claim 5, wherein the film containing fluoroplastics has irregularities.
- 34. (Previously Presented) A light-emitting apparatus according to Claim 17, wherein the film containing fluoroplastics has irregularities.
- 35. (Previously Presented) A light-emitting apparatus according to Claim 18, wherein the insulating film containing fluoroplastics has irregularities.
